

Маппинг статусов задач JIRA для Agile Dashboard

На этой странице содержится актуальный маппинг статусов задач Jira, которые мы используем для расчетов разных метрик Agile Dashboard

- **TO DO** - Бэклог задач, еще не брали на себя обязательства сделать задачу, таймер time to market/lead time не начал тикать, в этом статусе задача может лежать сколько угодно
- **IN PROGRESS** - Взяли на себя обязательство сделать эту задачу, начали по ней что-то делать, начал тикать таймер time to market/lead time
- **CANCELLED** - Решили, что эту задачу делать никогда не будем. Она больше не актуальна, удаляем ее из бэклога. Мы можем отменить как задачу, которая лежит в бэклоге, так и задачу, которую уже начали делать, но потом поняли, что она больше не актуальна и ее можно выбросить
- **DONE** - Задача окончательно выполнена. Таймер time to market/lead time останавливается
